

About RU Network JAPAN

The Research University Network of Japan (RU Network Japan) is an organization formed on a voluntary basis by universities and research institutes (current member organizations are printed on the back cover) that address research enhancement. We strongly promote collaboration with funding, government and private agencies beyond organizational borders, as well as further enhance the research capabilities of Japan by strengthening the research capabilities of each university and research institute and improving the support system for the research environment. Operation of the network is managed by the general meeting consisting of executive directors in charge of research or their alternate representatives at each member university or institute.

Five task forces by themes are set up for promotion of collaboration within members through discussion and intelligence sharing.

- Task Force on International Collaboration
- Task Force on Information Dissemination to the International Community
- Task Force on People-to-People Exchange and Career Path of URAs
- Task Force on Compliance
- Task Force on Academic Ranking Index of World Universities

Enhancing International Collaboration

Improving mutual communication between IRU Network Japan members and international research institutes, building a greater number of strong international partnerships.

■ Task Force on International Collaboration

This task force is organized to focus on the intensification of marketing power in order to facilitate interactions between RU Network Japan members and potential partners abroad.

Launch of a “Gateway” to Communication

contact@runetwork.jp

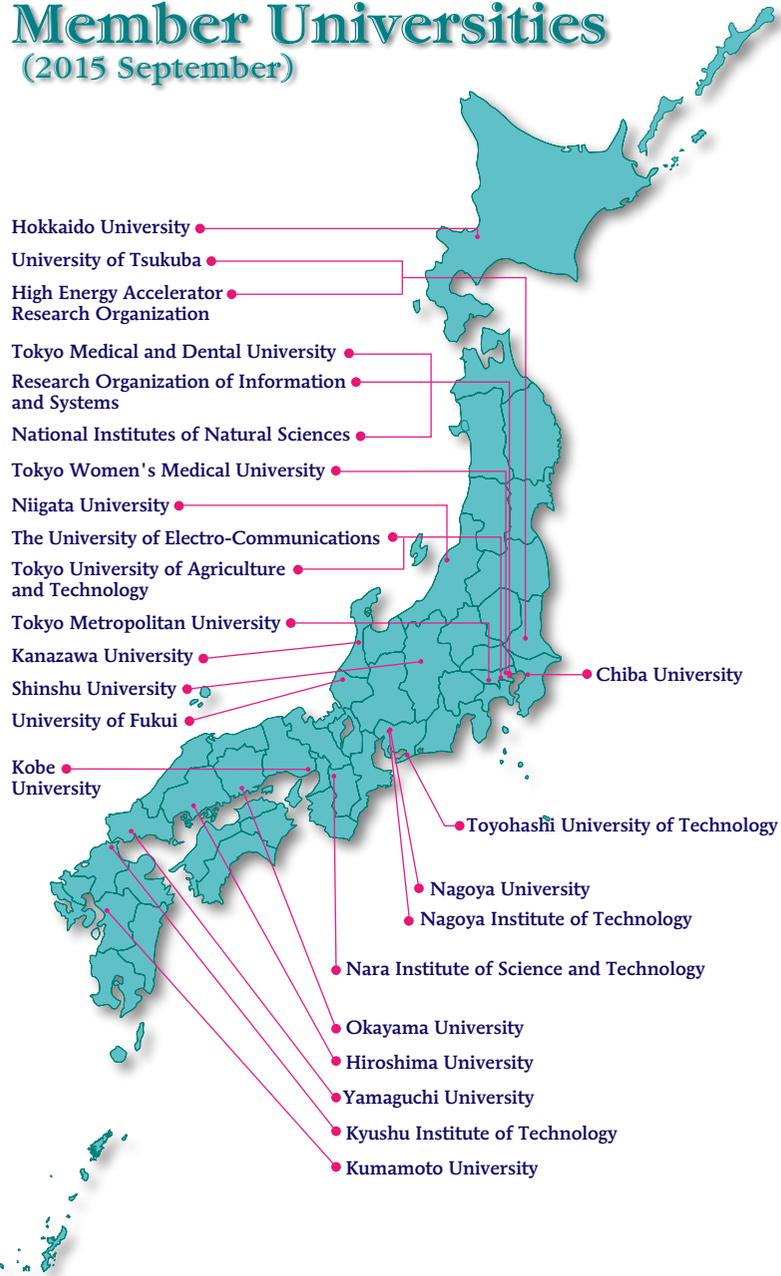

Any individual, university, or research related organization can access RU Network Japan members to search for a future collaborator.
